

REMARKS

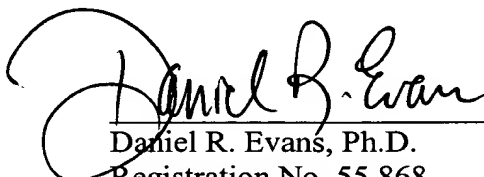

Applicants thank Examiner Langel for the indication that claims 1-5 are in a condition for allowance.

The Examiner has objected to the Specification since there is no Brief Description of the Drawings.

Accordingly, the Specification is amended to include said description. Support is found in the drawing sheet, as originally filed. Therefore, no new matter will be added upon entry of the amendment. Upon entry of the amendment the Specification will be in compliance with the guidelines set forth in MPEP §§ 608.01(a) and 608.01(f), and the application will be in a condition for allowance. An early and favorable indication is earnestly solicited.

Respectfully submitted,
